News

1. The Center for Digital Scholarship will present a workshop for FSPH faculty, **“Managing Your Digital Identity,”** in **RG 6040 on November 15**. This workshop is designed to help faculty increase the impact of their work. Part one will introduce simple strategies for managing your digital identity using one key profile. An online profile with the right information increases the visibility of your work in search results and helps you to find collaborators, promote your work, and track your impact. The Center for Digital Scholarship will provide examples and support while you enhance your profile in Google Scholar, ORCID, ImpactStory, or your personal web page. In part two, they will discuss how to share your work, connect it to your profile, and engage with your readers. They will help you choose the tools that are right for you and demonstrate how these tools work with online profiles and introduce sources of citation and altmetrics.
